

**OUR
VISION:**

**A STANDARDIZED,
INTEROPERABLE
AND
GLOBAL
ECOSYSTEM.
WORLDWIDE.**

grapevine is a producer-independent initiative that globally unites all IT-providers. Thus, it neither competes with other companies nor with other initiatives.

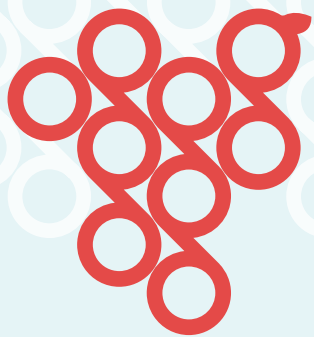

It consists of the marketplace (grapevine world) and the national grapevine companies. The aim is promoting the global IT-standardization by working together.

CORE OF INTEROPERABILITY //

STANDARDIZATION – THE KEY TO SUCCESS.

grapevine unites IT-providers, -suppliers, -integrators and investors with the aim of global IT-standardization. This will enable a more effective, cheaper and faster transfer of data. Thus, expensive and ineffective proprietary systems are a thing of the past.

Based on the remarkable pioneer work of the IHE for the health care sector grapevine provides a unique platform for expanding and promoting the future issue **interoperability** to all business lines and verticals - globally.

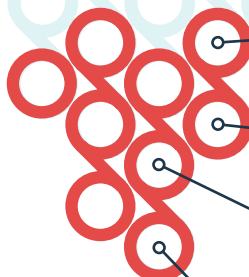

grapevine brings benefits for all parties involved – including end consumers, citizens and patients.

INTEGRATORS

CITIZENS

COMBINED STRENGTH WITH GRAPEVINE.

We are building a global ecosystem for market participants of every size of enterprise. Via our marketplace, products can be presented, licenses sold and new markets entered. Customers benefit from an extensive portfolio of products with guaranteed interoperability.

This is assured by a double-check process that all producers have to undergo: after a successful IHE-test the products are reviewed by grapevine.
